

The Inventory Solution For Dynamics AX

The Inventory Solution

- Simplifies the process of conducting physical inventory transactions.
- Facilitates accounting of WIP and Finished Goods inventories.
- Streamlines inventory reconciliations.
- Accounts for outside processing WIP inventories.
- Tag-based inventory simplifies inventory tagging by type.

One of the more challenging aspects of working with Dynamics AX is conducting and reconciling physical inventories, particularly WIP inventories. Agility Business Solutions has developed a tag-based inventory solution that dramatically simplifies the process of conducting physical inventories and reconciling inventories.

The Inventory Solution contains the following:

- Tag generator for regular “inventory” type items that provides the flexibility to print multiple tag formats and provides pre-printed tags for those items that are on hand
- Tag generator program for “WIP” type items
- New entry form for Tag Counting lines
- New entry form for WIP Counting lines
- New inquiry form to review and adjust count tags prior to processing and to reprint tags
- New inquiry form to review and adjust WIP counts prior to processing
- Tag Control reports for both WIP and regular count tags
- Variance reports for both WIP and regular count tags
- Outside operations report (for counted WIP requiring adjustment)
- WIP processing logic to create and post route cards to correct discrepancies
- New logic to remove and recreate reservations during count processing

The Inventory Solution for Dynamics AX provides a simple, streamlined interface that is easy to use and makes inventory-related transactions quick and effortless.
